

Further Details and Ordering Information

TTG's FSS IT Schedule and/or TTG's 8(a) STARS Schedule (GSA Schedule)

The General Services Administration (GSA) has assigned The Talus Group, Inc. Federal Supply Schedule (FSS) Information Technology (IT) Schedule contract number GS-35F-0754M and GSA STARS contract number GS-06F-0178Z. These contracts were awarded under Federal Supply Classification (FSC) Group 70 and are for Information Technology Professional Services.

General Information

GSA's Schedules are an efficient and cost effective process to provide complete technical solutions. When you place an order using an approved GSA Schedule, GSA Contracting Officers have already (1) negotiated the contract with the vendor, (2) determined the vendor's prices as being fair and reasonable, (3) Complied with all the procurement regulations for establishing the contracts, and (4) confirmed the the requirements of FAR 6.102.(d) (3) have been met.

Services Offered

TTG's GSA Schedules for IT Services include, but are not limited to the following services:

- Systems Analysis, Design and Implementation
- Web Page Development
- Software Applications Design and Development
- Database Design and Administration
- Computer Network Design, Administration & Support
- Internet, Intranet, and Extranet Development
- Security and Firewalls
- Data Acquisition, Analysis and Management
- Computer Facilities Management and Operations
- Data Warehousing and Data Mining

More details and specific labor categories and applicable rates for services can be found under these two heading for Government Services.

Ordering

To Place an order using TTG's approved FSS IT Schedule:

- If your order is under \$2,500; you may order directly from any approved schedule vendor
- If your order is over \$2,500; you can review three price lists and select the best value (this means consider items other than the lowest price such as warranty, past performance, training, delivery, etc.)
- If your order is over \$500,000 you should discuss a discount with us based on the services being ordered. The GSA has established a maximum order at which customers can seek a price reduction. At that price point or above, the vendor can offer a lower price, offer the current contract price or decline the order.

Credit Card Acceptance

A Government Credit Card can be used to place and pay for orders. Any Government official holding a valid card and operating within the constraints of designated thresholds and agency restrictions, may purchase IT services under this contract.

Teaming Arrangements

The Talus Group may team with other GSA Schedule holders to provide total solutions for customers. All participants of the Team must have an approved GSA contract.

Blanket Purchase Agreements (BPA)

BPAs allow an entire agency or group of offices to receive the benefits of negotiated discounts, without obligating funds until the order is actually placed. BPAs can be made to last as long as the FSS Schedule (5 years). Further, the agency does not need to make a best value selection for each order placed.

Latest and New Technology

The Talus Group may add new technology, services, and products upon review and approval of our GSA contracting officer. Using this mechanism, TTG can assure that its services are in line with emerging technologies.
